Statement of Operations: Three Months Ended March 31, 2016

- For the first quarter of 2016, Total Revenues increased 36% to \$7.0 billion from \$5.1 billion in the first quarter of 2015. The increase was primarily a result of the impact from expansions, acquisitions or new programs in many of our states in 2015 and the acquisition of Health Net.
- HBR of 88.7% for the first quarter of 2016 represents a decrease from 89.8% in the comparable period in 2015 and an increase from 88.0% in the fourth quarter of 2015. The year over year HBR decrease is primarily attributable to improvement in medical expense in the higher acuity populations and membership growth in Medicaid expansion and Health Insurance Marketplace, which operate at a lower HBR. HBR increased from 88.0% in the fourth quarter of 2015 to 88.7% in the first quarter of 2016, primarily attributable to an increase in flu related costs over the fourth quarter.
- The following table compares the results for new business and existing business for the quarters ended March 31:

	2016		2015
Premium and Service Revenue			
New business	18 %		23 %

Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology in each of the periods presented. Additionally, as a result of minimum HBR and other return of premium programs, approximately \$13 million of the "Incurred related to: Prior period" was recorded as a reduction to premium revenues.

The amount of the "Incurred related to: Prior period" above represents favorable development and includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service March 31, 2015 and prior.
