

Commitment to Sustainability Reporting

April 22, 2021

Throughout Centene Corporation's three decades of delivering high-quality health services to at-risk populations, we have never lost sight of the principles upon which our company was founded, including those that shape our focus on the environment, the health and social well-being of the communities we serve, and our culture of ethics and sound corporate governance.

Centene is continually expanding and improving its sustainability reporting and made measurable progress in 2020 and early 2021. We are committed to building upon this progress, including disclosing sustainability information aligned to relevant frameworks and standards. To that end, we commit to issue reporting aligned with the Sustainability Accounting Standards Board and Task Force on Climate-related Financial Disclosures by December 31, 2021.
