Statement of Operations: Three Months Ended March 31, 2013

- For the first quarter of 2013, Premium and Service Revenues increased 53% to \$2.5

billion from \$1.7 billion in the first quarter of 2012. The increase was primarily driven by the Texas, Mississippi, and Louisiana expansions, pharmacy carve-in in Texas and Louisiana, and the additions of the Kansas, Missouri and Washington contracts.

- Consolidated HBR of 90.4% for the first quarter of 2013 represents an increase from 88.2% in the comparable period in 2012 and a decrease from 91.3% in the fourth quarter of 2012. The increase compared to last year primarily reflects a higher level of flu costs of approximately \$0.20 per diluted share during the first quarter of 2013 as well as a higher level of medical costs in new business.
- The following table compares the results for new business and existing business for the quarter ended March 31:

	2013		2012
Premium and Service Revenue			
New business	35 %		20 %
Existing business	65 %		80 %
 HBR			
New business	94.1 %		90.7 %
Existing business	88.4 %		87.6 %
Total	90.4 %		88.2 %

- Consolidated G&A expense ratio for the first quarter of 2013 was 8.3%, compared to 9.8% in the prior year. The year over year decrease reflects the leveraging of expenses over higher revenues, partially offset by increased performance based compensation.
- Earnings from operations were \$40.1 million in the first quarter of 2013 compared to \$34.2 million in the first quarter of 2012. Net earnings attributable to Centene Corporation were \$23.0 million in the first quarter of 2013, compared to \$24.0 million in the first quarter of 2012.
- Diluted EPS was \$0.42 in the first quarter of 2013, including medical costs associated with flu of \$0.20 higher than experienced in 2012.

Balance Sheet and Cash Flow

At March 31, 2013, the Company had cash, investments and restricted deposits of \$1,664.5 million, including \$45.5 million held by its unregulated entities. Medical claims liabilities totaled \$1,067.0 million, representing 42.4 days in claims payable. Total debt was \$536.2 million which reflects no borrowings on the \$350 million revolving credit facility at quarter end. Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology in each of the periods presented.

The amount of the "Incurred related to: Prior period" above represents favorable development and includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service prior to March 31, 2012. Excluding the impact of medical costs related to retroactive assignment of members in our Kentucky health plan, the amount of "Incurred related to: Prior period" shown in the table above would have been favorable development of \$14.5 million.
