Statement of Operations: Three Months Ended September 30, 2015

Three Months Ended		
September 30,	September 30,	June 30,
2015	2014	2015

<i>(\$ in millions)</i>			
Total Revenues	\$ 5,821	\$ 4,352	\$ 5,506
Premium Tax and Health Insurer Fee Revenues	(358)	(193)	(322)
Premium and Service Revenues	\$ 5,463	\$ 4,159	\$ 5,184

- For the third quarter of 2015, Premium and Service Revenues increased 31% to \$5.5 billion from \$4.2 billion in the third quarter of 2014. The increase was primarily a result of the impact from expansions or new programs in many of our states, particularly Florida, Illinois, Louisiana, Mississippi, Ohio and Texas.
- Consolidated HBR of 89.0% for the third quarter of 2015 represents a decrease from 89.7% in the comparable period in 2014 and a decrease from 89.1% in the second quarter of 2015. The year over year HBR decrease is primarily attributable to a lower HBR associated with new Medicaid expansion programs, which had significant growth in membership over the prior year and have a lower HBR.
- The following table compares the results for new business and existing business for the quarters ended September 30:

	2015	2014
Premium and Service Revenue		
New business	21 %	27 %
Existing business	79 %	73 %
HBR		
New business	88.7 %	91.4 %
Existing business	89.1 %	89.0 %

- The new business HBR decreased compared to last year primarily due to the movement of the Florida MMA business, which operates at a higher HBR, into existing business during the quarter and the mix of new business being weighted towards Medicaid expansion which operates at a lower HBR.
- Consolidated G&A expense ratio for the third quarter of 2015 was 8.5%, compared to 8.0% in the prior year. The year over year increase in the G&A ratio primarily reflects the impact of Health Net merger related expenses. The G&A ratio for the three months ended September 30, 2015 was 8.2% excluding the impact of the Health Net merger related expenses. Excluding the impact of the Health Net merger related expenses, the increase in the G&A ratio is primarily due to the increase in performance based incentive compensation expense.
- Diluted earnings per share for the third quarter of 2015 of \$0.75, or \$0.84 excluding \$0.09 of diluted EPS associated with Health Net merger related expenses. This compares to diluted EPS for the third quarter of 2014 of \$0.67, or \$0.61 excluding a \$(0.08) impact associated with the health insurer fee, a \$(0.03) impact from transaction costs and a \$0.17 benefit associated with the final regulations on the deduction of compensation.

Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology in each of the periods presented. Additionally, as a result of minimum HBR and other return of premium programs,

approximately \$48 million of the "Incurred related to: Prior period" was reclassified to return of premium payable.

The amount of the "Incurred related to: Prior period" above represents favorable development and includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service September 30, 2014 and prior.
