## Statement of Operations: Three Months Ended September 30, 2020

- For the third quarter of 2020, total revenues increased 53% to \$29.1 billion from \$19.0 billion in the comparable period in 2019. The increase over the prior year was due to the acquisition of WellCare, growth in the Health Insurance Marketplace business, expansions, new programs and growth in many of our states, the reinstatement of the health insurer fee in 2020, and the ACA risk corridor receivable settlement, partially offset by the divestiture of our Illinois health plan.
- HBR of 86.4% for the third quarter of 2020 represents a decrease from 88.2% in the comparable period in 2019. The decrease was attributable to the ACA risk corridor receivable settlement and the effect of the COVID-19 pandemic, partially offset by retroactive state premium rate adjustments and risk sharing mechanisms. The effect of the COVID-19 pandemic includes lower traditional medical utilization, partially offset by higher testing and treatment costs associated with COVID-19.
- The SG&A expense ratio was 9.1% for the third quarter of 2020, compared to 8.9% in the third quarter of 2019. The Adjusted SG&A expense ratio was 8.9% for the third quarter of 2020, compared to 8.8% in the third quarter of 2019. The year-over-year increases to the ratios were due to the \$275 million charitable contribution commitment to our foundation, partially offset by the addition of the WellCare business, which operates at a lower SG&A ratio, and the leveraging of expenses over higher revenues.
- The effective tax rate was 26.8% for the third quarter of 2020, compared to 45.1% in the third quarter of 2019. The effective tax rate for the third quarter of 2020 reflects a favorable tax settlement, offset by the reinstatement of the health insurer fee in 2020.

The effective tax rate for the third quarter of 2019 reflects the non-deductibility of a portion of our non-cash goodwill and intangible impairment, offset by the health insurer fee moratorium. For the third quarter of 2020, our effective tax rate on adjusted earnings was 26.1%.

## Balance Sheet

Impact of the COVID-19 Pandemic <sup>(1)</sup>	(4)
State directed payments	2
Membership increases	1
Timing of claims payments	2
Days in claims payable, September 30, 2020	52

A significant portion of the quarter end Medical Claims Liability at June 30, 2020 included June dates of service where claims were near normalized levels.

- **Health Benefits Ratio (HBR) (GAAP)** = Medical costs divided by premium revenues.
- **SG&A Expense Ratio (GAAP)** = Selling, general and administrative expenses divided by premium and service revenues.
- **Adjusted SG&A Expenses (non-GAAP)** = Selling, general and administrative expenses, less acquisition related expenses.
- **Adjusted SG&A Expense Ratio (non-GAAP)** = Adjusted selling, general and administrative expenses divided by premium and service revenues.
- **Adjusted Net Earnings (non-GAAP)** = Net earnings less amortization of acquired intangible assets, less acquisition related expenses, as well as adjustments for other

items, net of the income tax effect of the adjustments.

- **Adjusted Diluted EPS (non-GAAP)** = Adjusted net earnings divided by weighted average common shares outstanding on a fully diluted basis.
- **Debt to Capitalization Ratio (GAAP)** = Total debt, divided by total debt plus total stockholder's equity.
- **Debt to Capitalization Ratio Excluding Non-Recourse Debt (non-GAAP)** = Total debt less non-recourse debt, divided by total debt less non-recourse debt plus total stockholder's equity.
- **Average Medical Claims Expense (GAAP)** = Medical costs for the period, divided by number of days in such period. Average Medical Claims Expense is most often calculated for the quarterly reporting period.
- **Days in Claims Payable (GAAP)** = Medical claims liabilities, divided by average medical claims expense. Days in Claims Payable is most often calculated for the quarterly reporting period.

In addition, the following terms are defined as follows:

- **State Directed Payments:** Payments directed by a state that have minimal risk, but are administered as a premium adjustment. These payments are recorded as premium revenue and medical costs at close to a 100% HBR. The Company has little visibility to the timing of these payments until they are paid by a state.
- **Pass Through Payments:** Non-risk supplemental payments from a state that the Company is required to pass through to designated contracted providers. These payments are recorded as premium tax revenue and premium tax expense.

## MEDICAL CLAIMS LIABILITY

The changes in medical claims liability are summarized as follows (in millions):

<b>Balance, September 30, 2019</b>	\$ 7,975
Less: reinsurance recoverable	21
<b>Balance, September 30, 2019, net</b>	<u>7,954</u>

<b>Balance, September 30, 2020, net</b>	<u>12,878</u>
Plus: reinsurance recoverable	21
<b>Balance, September 30, 2020</b>	<u>\$ 12,899</u>

Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology. Additionally, approximately \$42 million was recorded as a reduction from premium revenues resulting from development within "Incurred related to: Prior period" due to minimum HBR and other return of premium programs.

The amount of the "Incurred related to: Prior period" above represents favorable development and includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service September 30, 2019, and prior.
