Statement of Operations: Three Months Ended June 30, 2019

- For the second quarter of 2019, total revenues increased 29% to \$18.4 billion from \$14.2 billion in the comparable period in 2018. The increase over the prior year was primarily due to the acquisition of Fidelis Care, growth in the Health Insurance Marketplace business, expansions and new programs in many of our states in 2018 and 2019, particularly Arkansas, New Mexico, and Pennsylvania. These increases were

partially offset by the health insurer fee moratorium in 2019.

- Sequentially, total revenues decreased 1% from the first quarter of 2019 primarily due to significant pass through payments from the States of California and New York in the first quarter.
- HBR of 86.7% for the second quarter of 2019 represents an increase from 85.7% in the comparable period in 2018. The increase was primarily attributable to the Health Insurance Marketplace business where margins have normalized, as expected, from the favorable performance in 2018. The increase was also due to the health insurer fee moratorium and the acquisition of Fidelis Care, which operates at a higher HBR.
- HBR increased sequentially from 85.7% in the first quarter of 2019. The increase was primarily due to the normal seasonality in the Health Insurance Marketplace business.
- The SG&A expense ratio was 9.1% for the second quarter of 2019, compared to 9.6% in the second quarter of 2018. The Adjusted SG&A expense ratio was 9.0% for the second quarter of 2019, compared to 9.6% in the second quarter of 2018. The SG&A and Adjusted SG&A expense ratios both decreased due to the acquisition of Fidelis Care, which operates at a lower SG&A expense ratio.
- The effective tax rate was 25.7% for the second quarter of 2019, compared to 36.9% in the second quarter of 2018. The decrease in the effective tax rate was due to the impact of the health insurer fee moratorium.

(1) Incurred related to prior period does not include development on the acquired Fidelis Care medical claims liability as we closed that acquisition on July 1, 2018. Our Form 10-Q presents a rollforward for the six months ended June 30, 2019, which includes the development on Fidelis Care reserves, subsequent to the acquisition.

Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology. Additionally, approximately \$68 million was recorded as a decrease to premium revenues resulting from development within "Incurred related to: Prior period" due to minimum HBR and other return of premium programs.

The amount of the "Incurred related to: Prior period" above represents favorable development and includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service June 30, 2018, and prior.
